**Requesting an exception to the formulary:**

You can ask Network Health Insurance Corporation to make an exception to our coverage rules. Generally, we will only approve your request for an exception if the alternative drugs included on the plan's formulary, the lower-tiered drug or additional utilization restrictions would not be as effective in treating your condition and would cause you to have adverse medical effects. You should contact us to ask for an initial coverage decision for a formulary, tiering, or utilization restriction exception. When you are requesting a formulary, tiering or utilization restriction exception, you should submit a statement from your physician supporting your request. For more detailed information about your Network Health Insurance Corporation prescription drug coverage, please review your Evidence of Coverage and other plan materials.
